2. Primary Objective

This is according to us one of the best equity growth wrap funds in South Africa and intends to give clients according to their risk profiles and circumstances maximum ZAR growth over the medium to the long term. The fund will normally have a lower CAR than that of our Global SA Wrap fund, which buys locally registered offshore funds, but also with a much lower STD.

3. Investor Profile

Investors that seek to diversify investments and who are willing to tolerate volatility in the value of their investment. Investors should have no income requirements for funds invested in this portfolio and a time horizon of three to five years or more.
